Notice to California Students and Parents

FlexPoint maintains a comprehensive and engaging catalog of courses that offer students the opportunity to further their education and increase their overall academic success. In an effort to meet student needs specific to California, many of our courses have been submitted to UC for their A-G approval so that students attending a California university upon completing their K-12th grade studies can use our courses towards achieving that goal. The UC A-G approval process is very strenuous and specific in what is approved for use during a student's high school transcript review process, specifically in regards to online courses. While we believe our courses are of the highest quality, there are some that do not meet UC A-G requirements for various reasons. It is important that each student and parent verify UC A-G approval prior to enrolling in a course by visiting their site directly at <https://doorways.ucop.edu/list>. Additionally, feel free to reach out to your FlexPoint Representative.
